

This little *Piggie*...

Time flies...it's a saying we use every day, but it never seems more appropriate than when we watch our precious babies grow right before our eyes! Wee Piggies & Paws can help freeze a small moment in time with unique keepsakes featuring your children's hand and foot prints. Using a safe, non toxic molding process, Wee Piggies can make exact replica castings that are mounted in shadow boxes or on statue bases for you to treasure for years to come. Wee Piggies can custom create a one-of-a-kind memento to fit any size budget and any size family...including the family pet!

Michelle Keast of Wee Piggies & Paws in Barrie says nothing is more gratifying than seeing a parent's eyes light up when they receive their finished product. "Our babies are only babies for so long, and we tend to forget all those little wrinkles and dimples. Capturing that smallness will mean so much when you see your child all grown up."
